IVAN ROMANO

I specialize in front-end development by creating responsive, user-focused websites and portfolios. My strengths lie in translating client needs into interactive designs using HTML, CSS, JavaScript, and Bootstrap. I thrive in collaborative environments, leveraging Git, GitHub, and Scrum to ensure timely, high-quality project delivery.

EXPERIENCIA

Jan 2024 to July 2024
VISIONARY SOLUTION• TESTER • SANTO DOMINGO

Tester for a SaaS Platform working with the Functional and Non-Functional features of the Web platform and testing the platform's function, performing integration, E2E, and Unit Tests. I also perform non-functional testing like performance and usability tests, working with some of the black-box techniques.

July 2024 – December 2024
LANDING PAGE – FRONT-END DEVELOPER

Built a responsive veterinary landing page with appointment booking, using Bootstrap, Git/GitHub, and Scrum for efficient, collaborative delivery.

- Designed and developed a responsive landing page for a veterinary service platform, enabling users to explore services and schedule appointments via an integrated form.
- Utilized Bootstrap to ensure mobile-first, responsive design and seamless user experience across devices.
- Employed Git for version control and GitHub for team collaboration.
- Followed Scrum methodology to meet project deadlines and coordinate effectively with cross-functional team members.

DEMO

January 2025 – Ongoing
WEB PORTFOLIO – FRONT-END DEVELOPER

Creating a personalized web portfolio using CSS and JavaScript, with Git for version control and technical documentation to guide development.

- Developing a personalized web portfolio to showcase a developer's skills, projects, and contact information in a centralized and engaging format.
- Conducted technical analysis and documentation to guide the development process.
- Implemented custom styling using CSS and added interactivity with JavaScript.
- Leveraging Git for version control to manage project iterations and updates.
